

ALFATEC

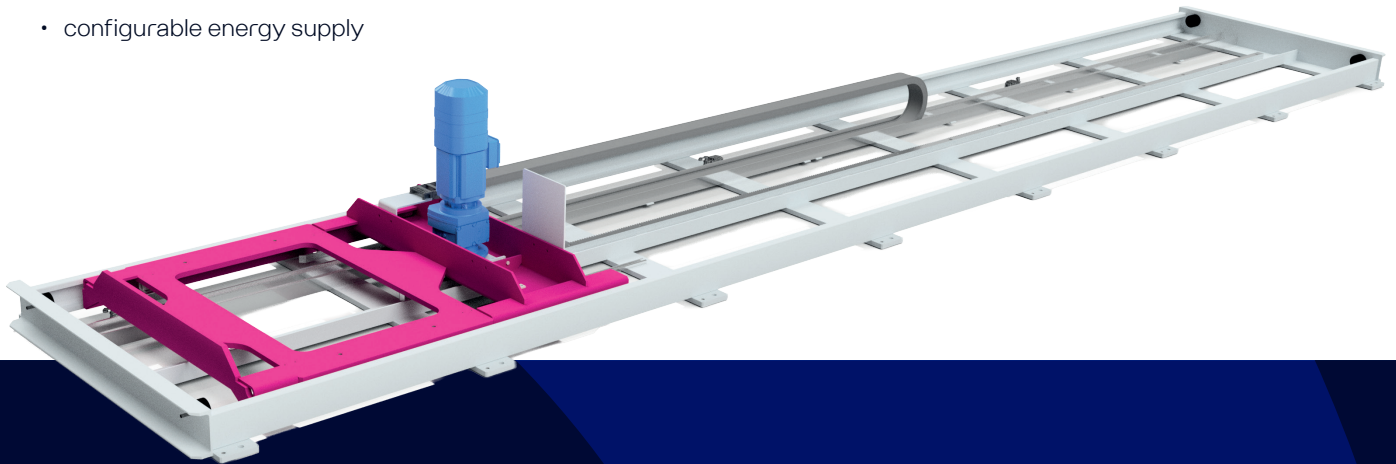

INDIVIDUAL HANDLING SYSTEMS

TRANSFER CART HEAVY-DUTY

- low overall height
- form fitting drive system
- maximum repeatability
- suitable for single and double deep telescopic forks
- scalable interface for conveyors
- ALFATEC guide bearings and guide profiles
- easy assembly due to prefabricated rail system

OPTIONEN

- central lubrication
- integrated lift axis
- position staking
- position measuring system
- flexible control interface
- configurable energy supply

TECHNICAL DETAILS

capacity load 15.000kg and more

driveway 100m and more

FACTS

- more options on request
- integration in existing environment
- applicable in all possible environmental conditions
- design, manufacture and assembly from a single source

GUIDE BEARINGS & GUIDE PROFILES

BECAUSE PRECISION IS ENGINEERED.

OUR MODULAR SYSTEM

We offer an all-round service package with a guarantee of success. The technological basis for each clever solution is our heavy-duty guide system with different versions of guide bearings and guide profiles. ALFATEC guide bearings and guide profiles can withstand high radial and axial loads. The ALFATEC components stand out due to their excellent durability.
